

REDLINE RACING
WOOD DALE CRITERIUM
American Bicycle Racing
ILLINOIS CRITERIUM CHAMPIONSHIP
TOI/W and ROTY Event
30 July 2006
WOOD DALE, ILLINOIS

Temps 75 to 90, Rain delay late morning, back up to 94, HUMID
Winds dead calm to fewer than 8 knots of wind.

To Qualify for State Champion status rider must be an Illinois resident an annual member of ABR.

One thing noticed throughout the day of racing, if you were not ready to ride hard from the start, you were seriously in danger of being dropped by the second lap. With no feed hand ups allowed in the criterium the racers needed to be hydrated and have aboard enough fluids for the race duration.

About half way through the Junior race Matt Novak goes into time trial mode and rides away lapping all. Kosela & Bowden were lapped only 30 yards from the finish. Kosela jumped, Bowden reacted but too late to beat Kosela. Lesson learned: All riders finish on same lap as leader, Ride too slow an another rider may pass, changing the whole outcome of the race. Kosela learned in March, Bowden in July. You Juniors rock, riding the whole distance with a try as hard as I can to the finish. Ashley was a bit wiped out from the previous Women race where she rode well.

11	Lazar	Harvey	IL	Athletes by Design
12	Krehbiel Jr.	John	IL	Midwest Masters
13	Beam	Gerald A.	IL	Lightning Bolt Cycling Club

Potylicki, Presti and Jones beat each other up trying to drop other riders and each other but they were together for the sprint. It took Goodger a few laps to get up to TT speed but once there he started to gobble up one rider at a time, of course they all tried to board the train, only Kallas and McGovern could hold on to out sprint the locomotive. Murphy and Lazar battled to the final sprint with Murphy taking the win.

8 laps into the combined Women race Corie, Jessica, June & Kristin were off on a breakaway from the field. 3 laps later Corie and Jessica were racing each other; June was between the break and the chasing field of 9 riders. With special lap primes being given out the pace was kept high. Jessica and Corie lapped all before their sprint finish except for endurance June who was on the verge of lapping the sprinting field. Excellent racing.

Take some top riders from a decade or two ago, toss them in with relatively new top riders (coached by some of these top riders from a decade ago) and you have a fast race. If you did not keep your head up the break was away and you were looking at the tail end of the field. With Redline Racing handing out Lap Primes donated by Park Tool, Corkill Ins., Dimensional Analysis, etc the pace was fast each lap. 7 riders were eventually away, with three chasing hard and another 5 trying to hold on. The sprint to the finish was hard fought for the lead 7. Damhoff, Woloszyn and Vonnahmen rode hard to finish on same lap as leaders. June Upshaw showed great endurance and speed in her second race of the day.

With so much speed and talent in this race it was impossible for riders to break away for very long. When the field of riders puts their collective mind to chasing a break, the break does not stay away for long. The pace was fast and kept that way with the help of numerous lap primes. Golden sprinter David Schaer was once again up the road looking back as he crossed the finish line. We should have a sprint between him and John Puffer, they both like to look back to see just how far ahead they finish from second place.

Another fast race with numerous break attempts failing until Mosora, Swinard and Lesniakowski, each from a different large team in the race, make their break away succeed. There were no lack of attempts to bridge, Zellmann was the only rider to be able to stay away from the field, sometimes that looked in jeopardy with the fast field and other break attempts trying to bridge to him. Swartzendruber and Menna get off the front near the end to finish ahead of the field.

Category 4 race kept a steady quick pace that made it difficult for riders to break away except for some jumps to take a prime prize. The field reeled in all attempts, swallowing and then attempting to spit them out the back. The long sprint to the finish was won by Lee Heaton.

After the rain delay the Officials shortened slightly other races so the Category 1, 2 & 3 race could be held the full 80-minute plus two-lap distance. Perhaps the rain delay made it possible for these riders to be very prepared to race at 25+ mph from the start. Every lap a break was forming, the speed was staggering, good we had extra bottles on the bike. 39 minutes into the race the break that worked Mead, Mumford, Puffer and Pearson had their sights on the tail end of the field to gain a lap. Up front Kelly and Correa were gapping the field and then Meshberg, Verner, Krueger joined on two laps later. This grew to 11 riders off the front including Mead and Mumford. As this group fell apart Mead and Mumford did a 30mph+ 2 man TT to lap the field a second time with two laps remaining securing 1st and 2nd. The final breakaway came going into the final lap with Tisdahl and Mosora quickly away and holding onto 5th and 6th at the finish. The final sprint saw Puffer taking 3rd followed by Metz for 7th. First five Cat 3 riders to finish must have had GPS tracking on each other because they finished together 12 through 16.

Just after the start of the Citizens race storm clouds, thunder and lightning descended into the race venue and the race was stopped for rider safety. Heavy rain soaked the course and water flowed down the curbs. 20 minutes later the rain stopped and after 10 more minutes the course was dry enough to resume racing. A few laps of increasing speed stretch the field out for the finish.
